Note on the Use of Artificial Intelligence

In the preparation and writing of this report, we made use of artificial intelligence tools, notably **Claude (Anthropic)** and **ChatGPT (OpenAI)**. Their use was limited to the following aspects:

- **Writing assistance:** rephrasing, improving clarity, and correcting grammar and syntax in English.
- **Brainstorming:** generating ideas and exploring different approaches during the design and development phases.
- **Technical support:** assistance in identifying and resolving bugs, as well as guidance in the implementation of certain functionalities.

All analyses, design choices, implementations, and conclusions presented in this report are the result of the authors' own work. The use of artificial intelligence tools did not replace the authors' understanding, reasoning, or decision-making process.

All intellectual contributions and authorship of this project remain exclusively attributed to its creators.
